

"As we continue to accelerate our focus on deeper security practices; we are excited to partner with NowSecure. As a recognized authority on mobile app security, I'm confident the collaboration with them will be a key piece of ensuring the security of our mobile apps going forward."

Eric Yuan, Founder and CEO
Zoom Video Communications

"NowSecure provides high-quality, comprehensive and almost immediate analysis, combining static and dynamic application security testing as well as security analysis of the running application process, with no operational overhead or setup (other than business logic information) using its app store download architecture."

Director of Application Security
Multinational Hospitality Company

"I was looking for a tool that would give me comprehensive intelligence on the security of an application based off the click of a button and NowSecure provides that functionality. NowSecure saves me a lot of time and it saves our developers a lot of time."

Rory McEntee, Former Director of Product Security
SAP Concur

What Are Customers Saying About NowSecure?

"Dev said they wanted 10 minutes or less, accurate results, no false positives, and complete automation. By meeting these requirements with NowSecure, we now have visibility and are fully automated into every build. It will automatically stop a build if a high-risk vuln presents."

Director App Security
Fortune 100 Financial Services Company

"We are excited to partner with experts like NowSecure to bring automated mobile app security testing and NIAP compliance into our BESPIN program. This new capability can help the Air Force, DoD and federal agencies confidently unleash more widespread development and use of mobile apps. From the SBIR award a year ago to shipping product today, we are achieving our goals of moving fast with continuous innovation."

Captain Michael Valentin
U.S. Air Force BESPIN Operations & Support Service Manager

"If I can give anybody advice, it would be to include NowSecure as early in the mobile app development process as possible."

Trang Gisler, Chief Digital Officer
MyOwnMed

"Don't trust any company that tells you they're secure but hasn't had an appropriate third-party verification. An impartial expert third-party assessment is really the only way to double check and triple check."

**Galina Datskovsky, CEO
Vaporstream**

"The NowSecure mobile application security solution has been a major time saver in our sprint releases. As we move to a DevOps model, the code releases are going to be much quicker and there's no way to keep up without automation."

**Application Security Executive
Regional Bank**

"We rarely get things that are ready to go out of the box, but when we received the NowSecure solution, we were up and running the same day."

**Derrick Smith, CEO of NSight365
Subcontractor for the U.S.
Marshals Service**

What Are Customers Saying About NowSecure?

"The amount of analysis time NowSecure Workstation has saved us is huge — just download the app on the device, run the tests, and I have a good picture of the security of the app."

**Engineer
Global Media and Entertainment
Company**

"At FIS, we have assembled an exceptional team and industry-leading tools to test quickly and regularly. We couldn't do what we do and how well we do it without NowSecure's mobile security technology and expertise."

**Steven Winter, Director of Quality
FIS Global**

"NowSecure helps us be proactive as an organization and gives us confidence that any security concerns we can control truly are in order when we let an app through to production."

**Travis Swinford, Product Manager
MEA Financial Enterprises**
